

# BETAIN ANHYDROUS

## ADVANTAGES:

- ☐ Improved nutrient digestibility
- ☐ Improved growth performance & feed utilisation
- ☐ Reduced abdominal fat amount
- ☐ Higher percentage of breast muscle
- ☐ Partial choline and methionine substitution
- ☐ Stabilised metabolism while heat stress
- ☐ Support of ionophoric coccidiostatica
- ☐ Feed cost reducti

Betaine acts as a methyl donor. The methyl groups are used via transmethylation for various metabolic reactions such as the synthesis of amino acids, creatine, carnitine and others. The methyl group metabolism is, among other things, important for the prevention of fatty liver syndrome. In addition, betaine serves as an organic osmolyte that protects cells from osmotic stress, dryness, high salt content and high salt content.

**BETAINE ANHYDROUS** contains min.  
97 % betaine (3a920)

**Packing:** 25 kg bags

# BETAIN ANHYDROUS

## MODE OF ACTION

Betaine acts as a methyl donor. The methyl groups are used via transmethylation for various metabolic reactions such as the synthesis of amino acids, creatine, carnitine and others. The methyl group metabolism is, among other things, important for the prevention of fatty liver syndrome. In addition, betaine serves as an organic osmolyte that protects cells from osmotic stress, dryness, high salt content and high salt content.

## DIRECTIONS OF USE

|                        |                                             |
|------------------------|---------------------------------------------|
| Poultry for fattening: | 500 g/ton feed<br>250 mg/lit drinking water |
| Laying hens            | 300 g/ton feed<br>150 g/lit drinking water  |
| Calves                 | 500 g/ton feed                              |
| Dairy Cows             | 30 g/animal per day                         |
| Goats/Sheep            | 1000 g/ton feed                             |
| Fish                   | 10 kg/ton feed                              |
| Crustaceans            | 10 kg/ton feed                              |

**Storage stability:** 24 months after manufacturing date if stored in a dry and cool place in original packaging. This product is water-attracting and must be stored in unopened bags.
